### EXPERIENCE

---

#### •RoBenDevs

Full-time

Software Engineer II

08/2023 - Present

- Led SaaS frontend development using Vite React, Redux Toolkit, and RTK Query.
- Implemented complex datagrids using MUIX datagrid for dynamic comparisons.
- Developed websocket implementations using Socket.IO.
- Created custom Vite Nginx configs for multi-app local development using Docker and Docker Compose.
- Worked with Bitbucket CI, Cypress, Jest, and Storybook for robust testing and continuous integration.
- Developed and published an in-house design system as an npm package.
- Conducted 5 interviews for frontend and full-stack mid-senior-level positions.

#### •Intelligent Machines

Full-time

Software Engineer

04/2020 - 02/2023

- Built modern user role-based analytics dashboard applications in React using HTML/SCSS, Redux, SWR, Recharts, and Apex Charts.
- Established and managed CI pipelines, automating deployments for front-end cloud-based applications.
- Migrated 2 existing projects to Typescript to improve codebase maintainability and scalability.
- Led front-end development of 3 high-value projects, contributing to 30% of the 2022 yearly revenue.
- Mentored newly recruited engineers and interns, facilitating their onboarding process.
- Implemented API caching on large projects, reducing backend server load by 70%.

#### •Intelligent Machines

Internship

Software Engineer Intern

01/2020 - 04/2020

- Gained experience in JavaScript, Express, Express routing, Passport Auth strategies, Firebase, and MongoDB.
- Worked with Google Cloud Platform (GCP) services including Cloud PubSub, Cloud Functions, and React applications.
- Developed understanding of building and deploying applications on cloud platforms.

#### •Upwork

Freelance

Freelance Web Developer

10/2018 - 01/2020

- Maintained a 100% Job Success Score as a front-end-focused freelance developer.
- Collaborated with over 19 clients from 7 different countries.
- Developed Shopify, WordPress, and React-based websites.
- Expanded technical expertise in Javascript, SASS/SCSS, React Native, Typescript, Docker, various deployment strategies, and REST API framework.

### EDUCATION

---

#### •Independent University, Bangladesh

Master of Sciences (M.Sc.) in Software Engineering, Project Management & Quality Assurance

2023

- Published research paper in Automated Vulnerability Assessment.

#### •Independent University, Bangladesh

Bachelor of Science (BSc) in Computer Science

2020

- Founding member of IUB Rover and Robotics Club - Team Attendant. Competed against Ivy League Universities at URC 2017-2018 in the United States.

### SKILLS

---

**Advanced:** HTML, CSS/SCSS, Express, React, Next.js, Firebase, Redux, Vite

**Intermediate:** Typescript, GCP services, MongoDB, Docker, CI/CD, Jest, Cypress, Storybook

**Languages:** English (Fluent)

### CERTIFICATES

---

#### •Cutshort Certified React.js - Advanced

02/2023 - Present

#### •Udacity React Nanodegree

12/2017 - Present
